## Job Title: Environmental Scientist

---

### Role summary

- Plan, conduct and manage environmental assessment, environmental investigation and environmental management projects.
- Provide environmental advice, project reports and management plans.
- Actively adhere to, and drive, NRA's service delivery mantra.
- Actively adhere to, and drive, the professional standards that underpin NRA's workplace.

### Essential duties and responsibilities

- Problem-solve and provide advice on environmental management matters to our clients.
- Plan, undertake or supervise surveys of the physical environment. This includes designing monitoring programs and environmental impact assessments and conducting environmental incident investigations either as a team member or as a project manager.
- Contribute to continuously improving NRA's services by acquiring additional skills and by incorporating or adapting emerging techniques and tools.
- Prepare project budgets and project proposals.
- Undertake fieldwork.
- Process and analyse field survey data.
- Prepare technical reports.
- Liaise with relevant regulatory agencies.
- Develop new clients, liaise with existing clients, and contribute to marketing NRA's services.
- Respect and value clients' needs and concerns.
- Maintain an excellent level of client service.
- Provide technical advice and assistance to colleagues in other disciplines.
- Follow NRA's quality, safety and environment procedures.

### Qualifications and experience

- Bachelor of Science with a major in a relevant subject.
- No less than 3 years of relevant post-university experience.
- Relevant experience in applied studies, technical report writing, communication and time management.
- Experience servicing the private sector, conducting or contributing to statutory environmental investigations or evaluations, and negotiating licence conditions.
- Experience liaising with regulatory agencies.

## **Knowledge and skills**

- A sound understanding of environmental chemistry.
- Sound analytical and problem-solving skills and the ability to identify key issues and develop practical solutions.
- Appropriate communication/language skills as defined by the needs of the client.
- Demonstrated ability to deliver high-quality reports on behalf of the company.
- Knowledge and application of relevant legislation, regulations and guidelines.
- Ability to manage and interpret large and complex datasets and to consolidate or present data in formats that are accessible to a wide range of end users.
- A sound understanding of quality assurance/quality control and sample handling procedures.
- Proven ability to manage projects and control budgets.

## **Certificates and licences**

- Current C class driver licence (manual).
- Senior first aid certificate (or ability to obtain).

## **Remuneration**

- Remuneration is based on technical qualifications and level of consulting experience. NRA offers competitive salary packages that are reviewed annually.

Candidates must have the right to permanently live and work in Australia.

Previous applicants need not apply.
